		Nicholas Culpeper (1616 - 1654), is best known today for his English Physician, a comprehensive guide to the medicinal uses of native plants and herbs, the first such book published in English. Culpeper, a Puritan, was the son of a clergyman. In 1634 he spent a year at Cambridge, where he learned Greek and Latin, which enabled him to study old medical texts. He was apprenticed to an apothecary and started his formal practice in Spitalfields, London, around 1640. Culpeper supported the Parliamentary side in the English Civil War, suffering a severe chest wound in 1643. After recovering he returned to his medical practice in London, where he established a reputation as an outstanding healer. War wounds combined with overwork led to his death by exhaustion in 1654, aged 37. According to his widow, he left behind some 70 unfinished manuscripts. Astrological Judgement of Diseases from the Decumbiture of the Sick, was published posthumously. This book is the astrological companion to his better-known English Physician. In this book is the distilled experience of a very busy practitioner. The text, while newly reset, retains the spelling and punctuation of the original.

Garrison, Cal	The Astrology of 2012 and Beyond	<p>In October 2007, a new phenomenon appeared in the sky, was named the Comet Holmes, and is being claimed and acclaimed by the Hopi Nation as the Blue Star of their prophecy. The Blue Star is the harbinger. Between now and somewhere in 2013-2014, when the Red Star appears, great shifts in human consciousness will continue. With the fulfillment of the Mayan Long Count calendar in 2012 and the appearance of the Red Star, many are predicting that human consciousness will rise to the next level. Although there may be catastrophic events associated with this period, and life as we know it will surely change, if we do the work, this will not be the Apocalypse. In The Astrology of 2012 and Beyond, Garrison explores the changing sky, starting with the movement of Pluto into Capricorn, a region it hasn't inhabited since 1733. It's revolutionary times coming for individuals, governments, and the planet. Garrison draws on traditional astrology and her understanding of the Hopi prophecies and their relationship to the Mayan 2012 predictions, as well as the ending of the 13,000 year masculine kundalini cycle, to offer practical advice and information that will help us evolve through the next four years, including what to expect during the nearly inevitable polar shift.</p>	125
Gauquelin, Michel	Cosmic Influences on Human Behaviour	<p>Dr Gauquelin discovered in studying the birth of 25,000 European professionals listed in "Who's Who", that certain planets were found more frequently at the rising or culminating positions in the horoscope. For example, Mars ascended or culminated in the case of athletes with the probability against chance distribution ranging from 1 in 50,000 to 1 in 1,000,000. This work has been internationally recognised as the most important scientific support that Astrology has ever received. Dr Gauquelin has validated the existence of a correlation between the state of the solar system and human experience.</p>	126

Hand, Robert	Essays on Astrology	This book presents a comprehensive look at the various essays of this very important author. As a reference book, Essays on Astrology is an invaluable resource. Some articles written several years ago, such as The Ascendant, Midheaven and Vertex in Extreme Latitudes, have been extremely hard to find. Still others are printed here for the very first time making this not only a reprint of Robert Hand's previous works, but an important addition to the study of astrology.	164

Hand, Robert	Planets in Youth	The first four chapters define the roles of mother and father, explain the effects of various planetary energy systems and discuss the meaning of elements and crosses in a child's chart. Hand analyses the charts of three children, including Judy Garland and Shirley Temple, to illustrate the astrological principles and psychological insights set forth in his intriguing study of personality development. The major part of the book consists of delineations of horoscope factors, written with young people in mind. Every planet in every sign, house and major aspect, as well as every rising sign, is interpreted in about three hundred words that stress possibilities rather than certainties. (2 x copies)	165
Hand, Robert	Horoscope Symbols	Takes you beyond your present conception of astrology into a whole new realm of understanding and to the fundamental principles that underlie astrology, beyond overemphasis on signs to the primacy of planets and angles. Although Hand assumes little prior knowledge of astrology, the more you know, the more you will get out of this book. ( x 2 copies)	166
Hand, Robert	Planets in Transit	THE definitive work on transiting planets. It's psychological insight and it's completeness as a reference book have brought Robert Hand recognition as the leading astrologer of his generation.	167

Ibn Izra, Abraham	The Beginning of Wisdom	One of the most important of the basic medieval texts of astrology. It served as the backbone to an extensive and quite complete textbook of astrology by Ibn Ezra	194
Ideman, Richard	Through the Looking Glass	Teaches us how to look at the natal chart to gain rich, new insight into our deepest nature - the hidden agendas, childhood patterns and the belief systems that invariably shape our lives and relationships. Combining the symbolism of astrology, mythology and Jungian psychology, he teaches us how to break free of the entrenched attitudes that limit and restrict us. Above all, Idemon provides new depth and dimension to the understanding of the most important aspect of our lives - how we reach out and interact with others. He tells us that the important people in our lives are like looking glasses - mirrors of our unfolding process toward a fuller consciousness. By looking into these mirrors we can transform ourselves and thus change the relationships which are so important to us.	195
Idemon, Richard	The Magic Thread	For centuries, philosophers, alchemists and psychologists have been intrigued and fascinated by the intricacies of the labyrinth as a metaphor for human experience. Richard Idemon sees the birth chart, a symbol of inherent universal order, as a labyrinth—a logical but complicated and elusive structure. The interwoven symbols in the horoscope are made up of a single thread that, when unravelled—like the magic thread of Ariadne—lead us through the maze to the heart of the chart and our own nature.	196

Jung, Carl G,	Synchronicity	Jung was intrigued from early in his career with coincidences, especially those surprising juxtapositions that scientific rationality could not adequately explain. He discussed these ideas with Albert Einstein before World War I, but first used the term "synchronicity" in a 1930 lecture, in reference to the unusual psychological insights generated from consulting the <i>I Ching</i> . A long correspondence and friendship with the Nobel Prize-winning physicist Wolfgang Pauli stimulated a final, mature statement of Jung's thinking on synchronicity, originally published in 1952 and reproduced here. Together with a wealth of historical and contemporary material, this essay describes an astrological experiment Jung conducted to test his theory. <i>Synchronicity</i> reveals the full extent of Jung's research into a wide range of psychic phenomena.	206

		This autobiography is unusual to say the least. It is replete with deep, profound, mystifying, eye-opening, tantalizing personal experiences rather than mundane happenings. It reads, at times, like a fantasy novel. I'd call this powerful book an impressionistic painting of Jung's life and work. It's very personal and very revealing. It's no wonder he left it to the very end of his life. Fortunately for us, he did provide the data & it was posthumously published. It provides a depth of context for his work that is available nowhere else. It is, however, expurgated--presumably by his family who didn't want all his dirty laundry (e.g. affairs with clients etc.) made public. After all, it was published not long after his death. There is much to learn from this book--even by those offended by it. As Jung says, p.247 "Everything that irritates us about others can lead us to an understanding of ourselves."	207

		Horary astrology shares with martial arts training the teaching of a combination of method and intuition. In both, repetitive practice results not merely in good technique, but ultimately in Art that goes beyond all technique. Horary possesses this martial quality because it is the only branch of Astrology that functions exclusively in the moment. Because Horary is immediate, its skills must be sharper, and cut deeper. The purpose of this work is to present the technique of Horary, viewed through the lens of Western Classical Astrology.	
Lehman, Dr J. Lee	The Martial Art of Astrology		219
		First and foremost, this is a reference book on rulerships; second, this is a classical concordance. Although astrological works dating from the seventeenth century and earlier lack explanations or discussions of the methods of assigning rulerships, we know that rulerships were assigned, and continue to be assigned, right up to the present moment, as new concepts/things are invented/discovered. Dr. Lehman examines how this process was really practiced in the classical period to give us insights into how to proceed today.	
Lehman, Dr J. Lee	The Book of Rulerships		220
		Using methods developed by ancient Astrologers, Lee Lehman works to strengthen techniques used by Astrologers today. The task of Classical Astrology today is twofold: to recover these techniques and to evaluate and understand them within a modern context. She presents both techniques and the logic behind them to radically improve all Astrology, regardless of whether the practitioner chooses to adopt a Classical or Neo-Classical approach. She analyses the charts of several famous people and events to demonstrate the techniques and their effectiveness.

		The influence of the aspect is not always subjective; it may be objectively demonstrated in the environment, or in a relationship with another person. For example, with a Mars transit, you may not be energetic, tempestuous, zestful, passionate, constructive, or destructive. But you may see an accident in the street; watch TV violence; contact a lusty, robust friend; find competition and stress in your work environment; or observe someone who is excited or acting in haste. In all astrological aspects there is a hierarchy of precedence that tends to be preemptive. The prime determinant is the innate character. The law of precedence states: The aspect that fits best into the character will take precedence over the aspect that is foreign to the character. Thoroughly researched and well written book.

Rudhyar, Dane	An Astrological Mandala	Rudhyar demonstrates how the Sabian symbols can be used for divination. Like Tarot cards and the I Ching, they provide clues to the best way to face anxieties, or suggest what alternative courses of action might mean in one's life. In the form of pictures that are easily recognizable to people today, these symbols can be said to constitute a contemporary, American I Ching, a series of symbols that goes to the very root of planetary significance for our present era.	317
Rudhyar, Dane	The Practice of Astrology	Rudhyar digs deep into the roots of astrology, its structure, meaning, and all those things that people normally don't want to concern themselves with, like responsibility and the limits of astrology.	318
Rudhyar, Dane	The Lunation Cycle	A unique technical breakthrough revealing the significance of the cyclic relationship of the sun and moon as phases of a larger process. Rudhyar formulates and describes here for the first time, the eight Soli Lunar types of personalities and the importance of the 'new moon before birth' and the 'progressed new moon charts'. Rudhyar's innovative presentation of the 'progressed lunation cycle' is an invaluable technique providing insight into how to use all life events in the actualisation of inner potentials. The meaning of specific events are viewed as an ordered series of Lunation phases, within the context of your whole life pattern, from birth to death. This is a practical and clear way to anticipate major turning points and transition periods and to understand our individual schedules of unfoldment.	319

		Begins with the philosophers of Greece in the 5th century BC. To the magic and stargazing of Egypt the Greeks added numerology, geometry and rational thought. The philosophy of Plato and later of the Stoics made astrology respectable, and by the time Ptolemy wrote his textbook the Tetrabiblos, in the second century AD, the main lines of astrological practice as it is known today had already been laid down. In future centuries astrology shifted to Islam only to return to the West in medieval times where it flourished until the shift of ideas during the Renaissance.	362

		The discussions of aspect configurations are more detailed than I've seen elsewhere, dealing in depth with different sorts of T-squares and grand trines while also treating some rarer combinations. The chapters on unaspected and retrograde planets are also very helpful. Perhaps the best thing about this book is its discussion of dissociate (out-of-sign) aspects; these are a problem that many treatments gloss over, but Tierney deals with them at length in a plausible way. Traditionally, the nodes have been interpreted superstitiously as points of good and bad luck, or they have been seen as the karmic catch-all for suffering, or they've been dismissed as meaningless. The author sees the opposition of the Nodes as a point of conflict between growth and stagnation, and working from this premise, has written a book designed to help readers determine how to balance the Nodes, how to find that missing part and develop it, and how to keep the Nodes balanced.	393

		The Arabic parts enable the astrologer to investigate the “inner” meaning of the horoscope and thus to go beyond the “outer” aspects expressed by the arrangement of the planets, signs, and houses. The first section of the book explains how fate, or karma, can be understood through the parts and the esoteric nature of number. The second section includes a translation of the 13th-century Latin text on the parts by the famed court astrologer, Bonatti; this work includes the basic ninety-seven parts, dealing with all areas of life--from war, commodities speculation, and professional life to marriage and partnerships--in addition to the seventy-three parts from various medieval sources. In the third section of the book, the author illustrates the practical use of the parts in natal, horary, and mundane astrology. His understanding of the parts and their place in a comprehensive interpretation of any horoscope is presented with lucidity and insight , unravelling for the reader this fascinating and long-neglected astrological science.
